

## **DECLARATION TO THE PARISH COUNCIL**

We, the members of the GREEN TEAM, do hereby wish to recommend:

That the new Parish Life Center building be built with environmentally sound principles,  
in regard to building materials, heating, lighting, and other concerns.

We realize that in many cases, this may increase the immediate cost,  
but in the long run, our environment may be improved and long term savings may be realized.

Our team is scheduled to meet in January with Michael Kenney (Cecelia Kenney's son) who is involved with the LEED (Leadership in Energy & Environmental Design) group.

We would welcome any of the council members participation in listening to him speak about considerations which will be helpful to us as we prepare to build.
